

What is Beogolf?

Beogolf is a new recreational sport that combines elements of golf, boules, skill, and strategy. It can be played almost anywhere: in a backyard, a park, on the beach, or on any small open space.

Thanks to its simple rules and accessible gameplay, Beogolf is suitable for families, friends, schools, sports clubs, and community events.

Our Vision: A Sport for Everyone

Sport should bring people together, create fun, and still offer meaningful challenges.

Our vision is to establish a sport that combines the simplicity of a game with the excitement of competition. A sport that anyone can start playing immediately, regardless of age, fitness level, or experience, while still offering room for skill, strategy, and personal improvement.

Our Mission: Accessibility First

We aim to create a sport that:

- Is accessible to everyone, with a very low barrier to entry
- Connects people across generations - children, adults, and seniors
- Can be enjoyed casually or played competitively
- Works almost anywhere: in gardens, parks, on beaches, sports fields, or at events
- Encourages people to spend more time outdoors in an increasingly digital and fast-paced world
- Promotes social interaction through real-life connections, laughter, friendly competition, and fair play

What Makes Beogolf Unique?

- Fast learning curve - anyone can play without lessons
- Simple and intuitive rules
- Portable and easy to take anywhere
- Optimized for three players, while still enjoyable with more participants

What Do You Need to Play Beogolf?

BeoChipper

The BeoChipper is designed for both right-handed and left-handed players and features an adjustable length to accommodate different player heights.

Beos

Beos are the balls used in the game. They have the same size and appearance as golf balls but are made from lightweight PU foam and come in different colors. This makes them significantly safer while maintaining a familiar golf-like feel.

BeoPin

The BeoPin serves as the target. It features a durable design consisting of a target ball and a visible flag.

BeoPad

The BeoPad is the hitting mat used for each shot. It was developed to protect the ground, allowing Beogolf to be played almost anywhere, including private gardens and public parks. It also creates equal playing conditions for all participants.

Optional Obstacles

Players may add obstacles to increase the challenge. A park bench, a tree, or other natural features can become part of the course. Official Beogolf pop-up obstacles are also available.

Who Is Beogolf For?

We see Beogolf as more than just a game—it is a social experience.

It can be:

- A fun activity after work
- A highlight at parties, festivals, and corporate events
- A gathering point for communities and clubs
- A team-building activity after football, tennis, or other sports training sessions
- An engaging activity for schools and youth programs

How Is Beogolf Organized?

Beogolf is currently organized by the German Beogolf Federation e.V., an officially registered association based in Fulda, Germany.

The federation coordinates the development of the sport, establishes rules and equipment standards, and supports the growth of a national and international Beogolf community.

What starts as a simple game can grow into a culture, a community, and a shared experience.

Looking Ahead

The long-term goals of the federation are to:

- Support local playing groups and tournaments
- Build an international Beogolf community
- Redefine outdoor games for a modern, open, and inclusive generation
